

Faculty Of Business Administration

Established in 2003, as one of the youngest and most entrepreneurial business schools in Sudan, with a reputation for innovative business education. The faculty combines the highest standards of academic rigor with a practical understanding of business and wealth creation. Moreover, the faculty is engaged in boundary-extending links on key management issues in dialogue with the wider intellectual community and practitioners.

Faculty Mission: The mission of the faculty is to serve the society in Sudan by producing modern, creative and innovative administrative and financial science graduates. The courses are designed to enable students to conduct modern business using the latest science and technology thus leading towards development and sustainable peace in the country.

Faculty Vision: The vision is that the Faculty of Business Administration will be the leading business faculty in Sudan, Africa and the Middle East in the near future.

Faculty Activities: Students need to participate efficiently in all faculty activities. Student exchanges, fairs and training opportunities are all activities which link the faculty with the wider community. Graduate research is a key factor in evaluating and promoting these entrepreneurs and other relevant fields. Students in professional and community services programs are linked to community problems and are required to take field trips and enable empowerment and assessment programs in rural areas. A set of public lectures to discuss burning issues and professional topics is one of the major faculty activities.

Admission Criteria

Minimum percentage to be admitted to the Faculty of Business Administration from Sudan School Certificate (or equivalent after evaluation) is 70%.

Course Phases

1. BSc. Degree
