Security Forces Hospital is a 500 bed acute care
Teaching Hospital serving the population of Ministry of Interior,
Kingdom of Saudi Arabia. SFH is accredited by The Canadian
Council on Health Services Accreditation (CCHSA) since October
2003.

The Radiology Department consists of conventional
radiology, Ultrasound, Nuclear Medicine and
CT/MRI divisions. There is about 70 technical and
personnel as well as 8 Radiologists. The workload is
clerical
about

90,000 exams per year.

The Department operates the latest models of Digital
Fluoroscopy and Digital Angiography equipment.

covering
management of the

In 1993, I have participated in planning and purchasing the MRI equipment for the hospital. The MRI Division became operational in April 1994. Since then, I have been the MRI and CT Divisions as well as Department.

large numbers of
Considerable numbers
various cases

The MRI equipment is G.E. Signa Advantage 1.5 Tesla equipped with MR Angiography. Our field of work covers all aspects of MRI i.e. CNS, body and musculo-system. However, most of my work is skeletal system and orthopedics due to spinal cases and joints examinations. of tumors as well as inflammatory and are also dealt with.

and neck.

We operate Siemens, Somatom Plus 4 Spiral CT scanner performing about 24 cases a day. These include Abdominal, Pelvic, Thoracic, C.N.S., as well as head

I have also established the Angiography and interventional services in this Department.

Radiology Club
major hospitals

I am the main organizer of the Radiology teaching for residents preparing for their higher degrees in Radiology, Medicine, Surgery and Pediatrics. I also gave lectures in Radiology for the medical staff at Security Forces Hospital and conducted Clinico-Radiological meetings with other Clinical Departments on weekly basis. I am one of the organizers and founders of the Riyadh which meets once every month at one of the of Riyadh in rotation.

Security Forces Hospital has an up to date I.T. Department with internet and intranet systems. The Hospital Information System (HIS) and the Integrated Radiology Information System are very well established. Our hospital is also linked by Telemedicine Communication System to known Medical Centers in the United States of America like Massachusetts General Hospital-Boston, Cleveland Clinic Foundation-Ohio as well as Duke University Medical Center.

August , 1983 - May, 1987

Lecturer of Radiology, Surgery Department,
Faculty of Medicine
University of Khartoum
Deputy Chief, Consultant Radiologist
Soba University Hospital, Khartoum

December, 1982 - July, 1983 Senior Registrar
Radiology Department Khartoum Teaching Hospital
Khartoum, Sudan

April, 1981 - November 1982 Registrar in Radiology Department
Charing Cross Hospital - Fulham Palace Road
L o n d o n

At Charing Cross Hospital, a worldwide reputable centre specially in Oncology, I had my training for the second part of the Fellowship of the Royal College of Radiologists in accordance with the curriculum and by-laws of that college. The training covered all aspects of General Radiology including CT, Ultrasound and Angiography. I had full responsibilities and performed the work of a Senior Registrar. I gained a large experience in dealing with Oncology cases during my period at Charing Cross Hospital.

Sept., 1978 - March, 1981 Registrar in Radiology Department
University College Hospital
London WC1

At the University College Hospital, I had my basic training for the first part of FRCR as well as for the DMRD. The training covered all aspects of radiology as well as the Physics and radiological anatomy. The first year of training was under the supervision of the Consultants. After that, I was allowed to perform and conduct Radiological exams on my own.
